

Conference on Instruction and Technology (CIT 2018)

SUNY Cortland ~ May 22 – 25, 2018

Conference Theme:

Elevate Learning: Taking Education Higher

In today's rapidly-changing higher education environment, we strive to raise the bar to engage all learners. Through the application of innovative pedagogical practices and emerging technologies, we continue to open doors. We design for the future learner and create immersive educational experiences. We employ evidence-based practices and sustained innovation in a globally-connected landscape. Please submit conference proposals that share your pedagogical innovations, student-centered experiences, flexible educational settings, application of trending technologies, and creative approaches to assessing evidence of learning.

Tracks

Immersive Learning - Today's learning can happen anyplace and at any time. Tomorrow's learners will have additional tools to engage with content. How are we leveraging immersive tools, such as augmented reality, virtual reality, experiential learning, project-based learning, or other environments outside of the traditional classroom? Share your experiences with implementing any immersive learning technologies or techniques.

Designing for the Future – What are the latest trends, apps, and gear for engaging learners? How do you design for the future of education? What drives your decisions about teaching the learners of tomorrow?

Sustainable Innovation - How do we scale and transfer our evidence-based successes? How do we build upon the success of innovative instructional initiatives (such as IITG, OER or COIL projects)? Share how your innovations impacted learning, student engagement, student enrollment, or recruitment and retention efforts at your campus.

Leveraging Evidence – How are we using evidence to influence decisions that improve learning? How is your campus effectively using data, competency-based learning, micro credentialing, or evidence-based practices to guide decisions about courses, programs, delivery methods, or the student experience?

Opening Doors – How is your campus opening doors to include all learners? How are you welcoming international, adult, first-generation learners, and Excelsior Scholarship recipients? How are you engaging with OERs and Universal Design for learning practices? What opportunities lie ahead and what challenges remain?
