

Brian Digman is the Chief Information Officer for the State of New York University Administration responsible for system-wide technology development and support. His portfolio includes SUNY's transformational Online initiative, which will use technology to scale SUNY's high-quality programs through a system-wide, seamless and digital student experience.

Brian joined SUNY in September 2018 following a 30-year career of progressively responsible leadership roles focused on transforming the business of government. As Chief Information Officer for the State of New York he was responsible for restructuring technology platforms, generating hundreds of millions of dollars in operational efficiencies while simultaneously delivering on major State policy goals ranging from economic development and public safety to the environment and social services.

As Director of IT Services at the NYS Thruway Authority, Brian developed the Authority's multi-year strategic plan for incorporating cutting-edge connected vehicle technologies into the Authority's day-to-day operations, with a focus on cashless tolling and driver safety.

Prior to that, Brian led the NYS Department of Taxation and Finance's modernization of the State's ecosystem of tax administration processes using innovations such as predictive analytics, electronic filing and high-speed processing, which has saved New York State over \$250 million, annually.
